

**Systems Implementation Project Management & Related  
Technical Support Services  
FMPA RFP 2022-214  
Questions & Answers**

**Q1:** Will support services be needed for procurement preparation of solicitations for GIS, CIS, WOMS, AMI and MWM systems?

**A1:** It is anticipated contracts will have been procured for a specific service and the bidder of this service will ensure that contract is followed. However, there may be an occasion where an ancillary procurement may be necessary. For that reason having a line item listing those costs would expedite the process.

**Q2:** What is the length for the entire master agreement specially the base term?

**A2:** Five (5) years with an optional five (5) one-year renewals.

**Q3:** How many master agreements will be awarded?

**A3:** If multiple vendors meet the qualifications and have comparable costs, we will accept more than one vendor. We do not have a specific number of vendors in mind.

**Q4:** Who are the current incumbents and their names?

**A4:** This is a new procurement effort.

**Q5:** What should we provide in Firm's Rate Schedule? Any specific Labor Categories that FMPA anticipates comparing bids?

**A5:** We do not have any matrix for comparison. The bidder would serve the process by providing descriptions and functions each position title.
