Financial Commitment Authority – Defined as the authorized personnel who have the ability to financially commit (sign on behalf of) the Agency (contracts, work orders, purchase orders, etc.). Authority levels are shown in the following table.

FMPA Financial Commitment Authority Levels

Authority Levels	Agency	ARP (Non-Commodity)	ARP (Commodity) [1]
General Manager	Up to \$200,000. For emergency events declared by the GM, GM has unlimited authority and must report to chairpersons of the EC and BOD within 5 days and the governing bodies at the next scheduled meeting	Up to total non-fuel Operations and Maintenance Budget and total Project Capital Budget, with non-budgeted items over \$200,000 reported at the next EC Meeting	<ul style="list-style-type: none"> Up to \$50 million notional value for transactions > 2 years but ≤ 7 years Up to \$15 million notional value for transactions > 1 month but ≤ 2 years Up to \$5 million notional value for transactions ≤ 1 month

The General Manager may authorize changes to the FMPP Financial Commitment Authority Levels table to reflect organizational changes solely to the extent that such changes do not increase the overall financial commitment authority levels set forth therein; however, any such changes must be reported to the Executive Committee at its next regularly scheduled meeting.

Once the Procurement Process has been completed and a vendor and total dollar amount have been negotiated, the above-referenced financial commitment authority determines who is authorized to sign contracts, work orders, purchase orders, etc.

Payment Approval Authority – Defined as managers and above who have the ability to approve vendor invoices and contractual obligations for services rendered. This is an administrative function to verify FMPP has received the good or services it contracted for in accordance with the counterparty's obligations and contract terms.

- a. Additional budget tests may exist, as further set by management.
- b. Should there be any desired change in the financial commitment (e.g., for a change order or other amendment to the existing financial commitment) that results in a higher total financial commitment, then the "Financial Commitment Authority" limits are reapplied to determine authority.

c. Mulberry Update

EC 9c – Mulberry Update

FMIPA Executive Committee

April 18, 2024

Mulberry Rotor Replacement Cancelled Due to Risks

FMPA and Northern Star Could Not Agree on Appropriate Risk Allocation

- Mulberry close set to Occur August 7, 2024
- The Mulberry Asset Purchase Agreement (APA) provided for acquisition of a spare steam turbine rotor
 - \$4M cost for new rotor was split between NS and FMPA
 - Previous cracking resulted in machining and repair of existing rotor, acquiring a spare was in unit's long term operation best interests
 - GE assessed lifespan to 2026
- Verbal agreement reached regarding FMPA & NS partnering on utilization of the spare rotor for replacement during Spring 2024 outage
- FMPA drafted contractual agreement to protect Members for three forms of risk:
 - Onsite outage damage to rotor not allowing installation
 - Post installation rotor not performing as expected due to poor installation but acceptable
 - Rotor installed, operated for a period, but ultimately must be removed by FMPA shortly after taking ownership
- Upon considering the remedies for these risks, reviewing the contractor warranty and insurance coverage, Northern Star could not financially justify taking on the outage, even for their initial intended benefit
- Northern Star also benefits financially through their existing PPA by returning to capacity and energy availability two weeks early

FMPA Now Working With NS On Protections for Rotor

Rotor Installation Timing Now Dependent On Discussions with GE

- Mulberry Purchase Agreement required FMPA to pay 50% of rotor cost if not materially damaged in transit
 - Rotor arrived from GE with no damage to crate, but still sealed in packing
- GE warranty on rotor expires 18 months after delivery or 12 months after installation
- FMPA will seek storage of the rotor in an appropriate semi-permanent container to prevent any corrosion or warping
- NS had already purchased all supporting hardware to allow for installation.
 - The purchase agreement did not require FMPA to pay for any of these parts
 - FMPA and NS will negotiate the outcome of the parts
- Secondary due diligence has begun with the outage starting 4/4

EC 9d – GRIP Grant Update

Executive
Committee
April 18, 2024

Grid Resilience & Innovation Partnership (GRIP) ~\$10B

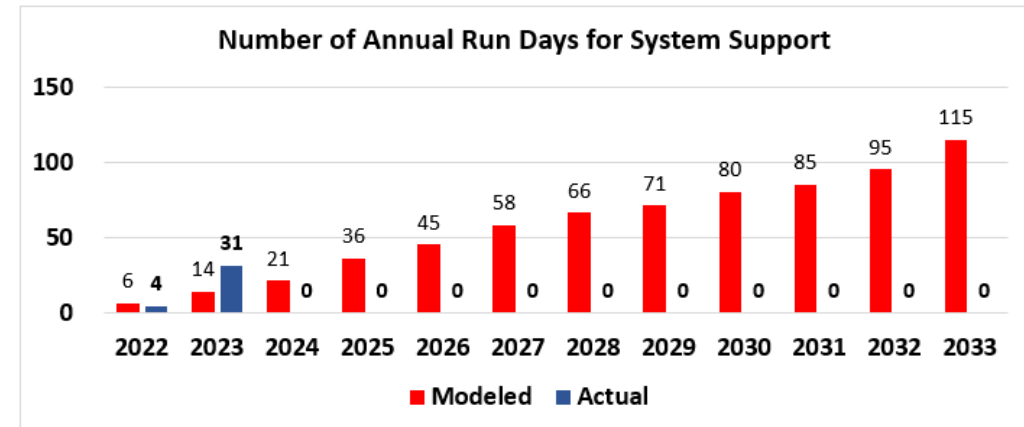

KEYS Concept Paper Accepted for 2nd Round Of Funding

- KEYS is pursuing 2nd round of funding for GRIP grant, which reflects pool of up to \$3.9B as driven from Bipartisan Infrastructure Law (50% cost share)
- Goals are to deploy resources to enhance grid flexibility and improve resilience of the power system
- Concept paper due January 2024 was submitted and received with encouragement to prepare full package by May 2024
- KEYS proposal includes key elements such as AMI, Battery Energy Storage System (BESS) deployment, replacement/enlargement of two autotransformers, distribution reclosers, and other related technology components
- FMMPA supporting KEYS with package, focusing on BESS benefits (direct and indirect through emissions reductions) and overall value proposition

Tie-Line Support Above Modeled Due to Weather

Weather Normalized Analysis Suggests Gradual Growth

- The Stock Island assets generated 1,956 MWh for tie-line support this year under 31 event days.
- Weather normalizing KEYS and recognizing uncertainty in FKEC weather response and losses, using KEYS' existing normalization model, we would expect ~33-86 MWh over ~4-8 event days
- Suggests strike and energy amounts closer to 2022 actuals, and more gradual pace of change absent weather
- Hot summers persisting can move frequency higher and with 50% cost share reduces uncertainty on BESS value

S&L Feasibility Findings Reflected Value w/Growth

~\$1,300 per kW Cost Modeled in Use Case Study

- Recent IRP BESS costs estimated at ~\$2,200 per kW by 1898
- Cost increases driven by recent inflation
- 50% cost share and ITC could bring effective capital cost to ~\$1,000 or closer to parity with S&L study estimates
- FKEC load growth uncertain – no “perfect” strike time
- Cost share will bring value in avoided energy and reduce long term wear on rest of Stock Island fleet

BESS target of 10-15 MW w/4 hour duration.

- e. FMPA-KUA Transmission Owner
Registration for Cane Island North
Bay Substation**

**Executive Committee

9e FMIPA-KUA Transmission Owner Registration for Cane Island Substation North Bay

FMIPA Executive Committee

April 18, 2024

Revise FMPA-KUA Transmission Owner Registration

Eliminate Unnecessary Compliance Risk with Change in Configuration

- FMPA and KUA are NERC-registered Transmission Owners (TOs) for certain substation facilities at Cane Island
- KUA currently performs compliance related activities for *entire* substation
- Arrangement creates unnecessary risk of double jeopardy, compliance violations.
- **Objective:** Simplify compliance relationship and reduce risk by clearly delineating responsibility for transmission assets vs. generation assets:
 - FMPA registered as sole Generator Owner (complete)
 - KUA registered as sole Transmission Owner, FMPA deregister as TO

Current CIPP Substation Ownership Structure

- FMPA & KUA Shared CIPP Substation Ownership
 - FMPA: 67.8% of 4 bus sections, 12 breakers, 4 transmission lines
 - KUA: 32.2% of 4 bus sections, 12 breakers, 4 transmission lines
- FMPA Sole Ownership of CIPP North Bay
 - 100% of 1 bus section, 2 breakers (North Bay)
 - FMPA installed Special Protection System (SPS) at CI substation North Bay, increasing NERC compliance responsibility - FMPA responsible party
 - However, SPS was retired in May 2021
 - Sole reason why FMPA is registered as a TO

FMPA Deregistration / KUA Registration

Joint Registration Organization (JRO)

- Definition of “Transmission Owner” is the “entity that owns and maintains transmission Facilities.”
 - KUA maintains, but does not “own” any portion of the North Bay
- Solution: KUA becomes a Joint Registration Organization (JRO) on behalf of FMPA and KUA for TO function
 - JRO agreement b/n FMPA and KUA (see NERC Rules of Procedure, s. 507)
 - No Cane Island asset ownership changes necessary
 - KUA registers with SERC/NERC as JRO TO; FMPA deregisters

Next Steps

- No action requested at this time
- May EC Meeting: Approval of Joint Registration Organization Agreement between FMPA and KUA to be requested
