From: Sharon Samuels
Re: Substation & Generating Station Maintenance Services Bid ITB# 2022-034
Award Extension

The current Provision of Substation & Generating Station Maintenance Services Bid award extension is scheduled to expire February 28, 2026. According to the FMPA Terms & Conditions, the bid award may be extended annually by mutual consent.

Last year, the award was extended with ABB, Inc.; Electric Power Systems; Electrical Engineering Enterprise; Flo Power; MP Predictive Technologies (RESA Power); North American Substation Services; Patterson & Dewar; Premier Power Maintenance; and Southern Switches & Contacts.

All awarded bidders have been contacted to determine their interest in extending the bid award for an additional year.

ABB, Inc. has provided their 2026 price increase in accordance with Paragraph 13 (escalation/de-escalation) of the Terms and Conditions section of the bid. It was accepted by the Participating Members.

Electrical Engineering Enterprises has requested a 5% price increase in accordance with Paragraph 13 (escalation/de-escalation) of the Terms and Conditions section of the bid, to account for the rising inflation costs. It was accepted by the Participating Members. They also informed us that they have recently acquired Flo Power, one of the other bidders awarded this service. Please make sure to note this change.

All other bidders have agreed to extend their terms and prices for an additional year. All other aspects of the bid remain the same. **This award extension expires on February 28, 2027.**

If you have any questions regarding this bid extension opportunity, please feel free to contact me.
